

The Berkeley Center for Theoretical Physics was formed so that some of the world's preeminent theoretical physicists could come together to collaborate, benefit from one another's research and through their collective thinking, answer some of the most pressing questions about particles, spacetime and cosmology.

The Berkeley Center for Theoretical Physics

Opening Symposium

Friday October 19 – Saturday October 20, 2007

The University of California, Berkeley
Old LeConte Hall, 4th Floor

The BCTP Presents A Public Lecture by
Nobel Laureate and Berkeley Alumnus,

David Gross

(The Kavli Institute at UCSB)

"The Coming Revolutions in Fundamental Physics"

Friday October 19, 2007

Chevron Auditorium at
International House, 6:00 pm

Speakers

Nima Arkani-Hamed

Beate Heinemann

Joe Polchinski

Lisa Randall

John Schwarz

Andy Strominger

Cumrun Vafa

Mark Wise

Tsutomu Yanagida

Matias Zaldariaga
